

OPEN ACCESS LICENCE TO PUBLISH (CC BY-NC-ND)

PUBLICATION: The Biochemist magazine

Publisher: Portland Press Limited

TITLE (Article):

AUTHOR(S):

REQUIREMENTS

You are required to complete and return this Licence to Publish form, ticking box A or B in Section 1 and obtaining the correct signature in Section 2.

NOTE: your Article will not be released until the Licence to Publish has been received.

OPEN ACCESS LICENCE TO PUBLISH

Subject to the Requirements being met, Portland Press Limited and the Biochemical Society will make this contribution to the Magazine (the Article) freely available under a [CC BY-NC-ND 4.0](#) licence immediately upon publication.

Notwithstanding any rights granted to the Author(s) by Portland Press Limited and the Biochemical Society (Section 1), all users of Open Access Articles are entitled to use, reproduce, disseminate or display articles, provided that:

- a. Original authorship is properly and fully attributed
- b. The Journal, Portland Press Limited and the Biochemical Society are attributed as the original place of publication of the Article, with the correct citation details and hyperlink provided
- c. The Article (or parts of it) may not be reused or distributed for **commercial purposes**
- d. If content from the Article is **remixed, transformed, or built upon**, the modified material may not be distributed

Commercial re-use and/or creation of derivative works or adaptations are not allowed without express permission being sought.

SECTION 1: LICENCE TO PUBLISH

1. To allow your Article to be distributed as widely as possible in the Publication, you grant Portland Press Limited and the Biochemical Society an exclusive licence to publish the above Article on behalf of the Biochemical Society. The Article is deemed to include all material submitted for publication, including, but not limited to, any abstract, text, figures, tables and/or supplementary material accompanying the Article.
2. Ownership of copyright remains with the Author(s) (or the Author(s)'s Employer if the Employer owns the copyright in the work).
3. Provided that when reproducing the Article or extracts from it, the provenance of the Publication (journal) is acknowledged in standard bibliographic citation form, the Author(s) retains the following non-exclusive rights:

- a. to use the article as long as it is not sold or given away in ways which would conflict directly with the Publisher's commercial business interests;
- b. to reproduce the Article, in whole or in part, in any work of which they are the Author(s) so long as reproduced work is not sold or given away in ways which would conflict directly with the Publisher's commercial interests;
- c. to use the Article for the purposes of teaching at the academic organization at which they work, including use in course packs.

Despite non-commercial and no-derivatives clauses of the [CC BY-NC-ND](#) licence for the Article, as the Author(s) you need not seek permission from Portland Press Limited and the Biochemical Society to apply the above rights.

A. Copyright belongs to the Author or the Author's employer

Portland Press Limited and the Biochemical Society are granted an exclusive licence for the full period of copyright throughout the World:

1. to publish, reproduce, distribute, display and store all versions of the Article in the Journal in all forms in all media whether now known or developed hereafter (including without limitation, print, digital and electronic) in all territories throughout the world and in all universes;
2. seek payment of fees from corporate and academic bodies or individuals for the privilege of adapting and or selling electronic or print copies or derivative versions of the article (e.g. reprints);
3. to translate any version of the Article into other languages, create electronic links to third-party material wherever it may be situated; create adaptations, abstracts, summaries or extracts, or other derivative works based on the Article in such translations, electronic links, abstracts, summaries and extracts, or other derivative works;
4. to deposit copies of the article in online archives maintained by Portland Press Limited and the Biochemical Society or by third parties authorized to do so by Portland Press Limited and the Biochemical Society;
5. Portland Press Limited is authorized to act on your behalf to defend copyright in the Article should anyone infringe it and to register the copyright of the Article in other countries, if necessary.

B. The Article is in the public domain (e.g. US Government publication), protected by the UK Crown Copyright or cannot be fully licensed as requested

If you selected B, please briefly indicate the reason here:

SECTION 2: DECLARATION

You are confirming that:

- a. the material is original
- b. you are the sole Author(s) and sole owner(s) of copyright in the Article
- c. any Author who has signed this agreement for or on behalf of all other Authors has the full right, power and authority to enter into this agreement with the Publisher and the Biochemical Society and that all Co-Authors have read and agreed the terms of this agreement
- d. the Article is not under consideration for publication elsewhere and has not been previously published elsewhere
- e. all of the institutions in which the work reported in the Article was carried out have authorized publication of the Article

- f. you agree that this Article will be distributed by Portland Press Limited and the Biochemical Society under the terms of the Creative Commons Attribution Licence (CC-BY-NC-ND) (<http://creativecommons.org/licenses/by-nc-nd/4.0/>), which permits unrestricted readership and sharing of the article in its entirety provided that:
- o the original work is properly cited
 - o the material may not be reused or distributed for **commercial purposes**
 - o if the material is **remixed, transformed, or built upon**, the modified material may not be distributed

Commercial re-use and/or creation of derivative works or adaptations are not allowed without express permission being sought.

You warrant to Portland Press Limited and the Biochemical Society that:

- a. the material contains no violation of any existing duty of confidentiality, contract or intellectual property rights (including without limitation copyright, patent, or trademark or other third-party right)
- b. nothing in the article is obscene, defamatory, libellous or unlawful or in any way actionable
- c. all statements purporting to be facts contained in any version of the Article are true and any formula or instruction contained in the Article will not, if followed accurately, cause any injury, illness or damage to the user
- d. if any version of the Article includes excerpts from other copyright works, the Author(s) has obtained permission from the copyright holders of such material to enable the Author(s) to grant the rights contained herein and that such material has been appropriately acknowledged in the Article
- e. copies of all such permissions are attached to this licence and returned to the Publisher
- f. you will indemnify and keep indemnified the Publisher in respect of claims made against it by third parties for copyright infringement related to publication of the material, or any actions concerning the ownership of the material or rights to publish the material.
